# MATIN NAJAFOV

## FRONTEND DEVELOPER

As a Junior Front-End Developer, I am eager to bring my skills in HTML, CSS, and JavaScript to the table. I am well-versed in React and have a basic understanding of Node.js, Express.js, and MongoDB. My strong foundation in web design and development is evident in my ability to create responsive and user-friendly websites using Bootstrap, Tailwind, and Sass. I am a quick learner and am constantly looking to expand my skillset, including experience with state management using Redux and Agile methodologies. I am confident in my abilities to deliver high-quality projects and am eager to contribute to a team environment.
